sensory integration dysfunctions
autism/ autism spectrum disorders
acquired brain injury
general learning disabilities
trouble with motor skills and coordination

reading & writing difficulties
conduct disorders
tics and Tourette's Syndrome
dyslexia
and much more.

HANDLE® Introductory Courses Levels 1 and 2 combined

October 11-12th, 2014, SSNT, Fitzroy, VIC

Helping extraordinary people of all ages do ordinary things.

- This course introduces an interactive approach for identifying and treating the root cause of problems across the life-span. It focuses on what causes learning and social difficulties and many other behavioural challenges.
- Participants see themselves and others through new eyes, and leave with tools to apply to many situations.
- Participants then can apply the practical tools and knowledge to school, work and life situations.

"This is crucial information for anyone working with children. I can't imagine anyone who wouldn't benefit."

– Steve Goldenberg, Primary School Teacher
